Cognitive Science Engineer & UX Designer specializing in complex system architectures, design systems, and cognitive load reduction. Proven track record in data-driven user research and high-fidelity prototyping across enterprise, aerospace, and startup environments.

WORK EXPERIENCE

UX Designer Intern — Ubisoft — Feb 2026 - Jul 2026, Paris

- Uncovered core creator friction by conducting community research across 20+ creators & 60+ reports.
- Prioritized 24 concepts down to 1 core roadmap initiative via an expert co-design workshop.
- Quantified a +40.3 pt SUS score lift (51.4 to 91.7) by conducting comparative usability testing.
- Drove executive stakeholder alignment by pitching complex creator journeys via visual storytelling.
- Secured 100% buy-in across 3 key lead roles (CRM, Strategy, Platform) via RACI frameworks.
- Defined post-launch adoption targets for 14,000+ creators to align product and business leads.

Lead UX Designer — Stealth Startup — Apr 2025 - Jan 2026, Bordeaux

- Validated initial product hypothesis by proving a 77.5% swipe UI rejection rate (300+ users).
- Engineered a 4-stage live video journey using Apple HIG and PACE microcopy across 6 core screens.
- Scaled UI architecture by building a tokenized Figma system (60+ vars, 90+ components) & 100+ screens.

UX Consultant Intern — Airbus & IMS Laboratory — May 2025 - Jul 2025, Bordeaux

- Diagnosed 3D simulator friction by triangulating data from 7 user interviews and 75 survey responses.
- Prioritized 9 critical usability blockers using 3D heuristic audits to deliver an action matrix.
- Reduced cognitive load by introducing radial action menus and CAD-standardized 3D controls.
- Delivered Figma mockups and recommendation catalogs approved by Airbus engineers and training leads.

KEY PROJECTS

EmCo, Mobile Biometric Diagnostic App — UX Designer, (Academic) — Jan 2026

- Engineered a 20-screen mobile prototype (20+ components) mapping cognitive load vs. stress via sensors.
- Improved 2D plot readability by designing a temporal slider validated through AttrakDiff testing.

Desk Friend & Smart Cart, Design Relay — UX Researcher & Designer, (Academic) — Oct 2024 - Feb 2025

- Consolidated 11 fragmented spec themes into 1 unified smart desk controller with 6 core features.
- Validated an autonomous 100L cart interface via field testing with 9 shoppers in retail settings.

Intranet IA Overhaul — UX Researcher & Designer, (Academic) — Oct 2025 - Dec 2025

- Restructured the Information Architecture of 33 portal tools via Open Card Sorting with 9 users.
- Reduced navigation friction across 12 categories by aligning taxonomy with student mental models.

Figma Course, Student Curriculum — UX Course Author (Self-Initiated) — Nov 2025 - Jan 2026

- Architected a 90+ slide Figma curriculum guiding beginners from UI basics to dev handoff.

SKILLS

Research: User Research (Qual & Quant), Usability Testing (SUS, UMUX, AttrakDiff), Heuristic Evaluation, Information Architecture, Card Sorting, Similarity Matrix, Contextual Inquiry, A/B & Comparative Testing.

Design: Wireframing, Rapid Prototyping, Visual Storytelling, Storyboarding, Design Systems (Tokens & Variables), 3D Spatial Ergonomics, Cognitive Load Optimization, Mental Model Mapping, Accessibility (WCAG 2.1 AA).

Strategy: Co-Design Workshop Facilitation, Ideation (ASIT, Impact/Effort), RACI Framework, Design Enablement, Product Roadmap Alignment, Stakeholder Strategy.

Tools: Figma (Advanced Auto Layout, Variants, Variables, Components), FigJam, Miro, Jira, Notion, Whisper, Git.

Languages: French (Native), English (C1).

EDUCATION

M.Sc. in Cognitive Engineering — National Superior School of Cognitics — 2023 - 2026, Bodreaux

Specialization: UX Design, Human-Computer Interaction, Data Analysis

Preparatory Classes in Maths and Physics — Cycle Préparatoire de Bordeaux — 2021 - 2023, Bodreaux
